- Databases: PostgreSQL, MySQL, MongoDB
- Networking & security
- Linux system administration
- Deployment & infrastructure (Docker, Nginx)
- Payments integration (Paystack, card, USSD)
- UI/UX prototyping
- Code debugging

LANGUAGES

- English (Fluent)

PROFILE

Full-stack web developer and founder of Wyntek Technologies, a Nigeria-based studio delivering web design, networking and security work for small businesses and larger corporate clients. Builds across the full stack — responsive React front ends, Django REST Framework APIs, authentication and payments — and keeps the underlying servers secure and online. Adept at taking a project from a rough idea to a working product, including UI/UX prototyping and custom client sites.

WORK EXPERIENCE

Wyntek Technologies

FOUNDING — PRESENT

Founder / Full-Stack Web Developer

- Run a Nigeria-based studio delivering web design, networking and security work to small businesses and corporate clients, through both one-off builds and retainer engagements.
- Designed and built the agency's own site, service pages and visual identity.
- Built Shefitts.co, a Nigerian fashion e-commerce storefront: responsive collections grid with swipe carousels, and a single-page checkout supporting card, bank transfer, Paystack and USSD.
- Built Eakslin Courier, a service-focused logistics site geared toward client acquisition.
- Built REST APIs with Django REST Framework, including JWT/OTP authentication and async jobs (Celery/Redis).

EmpireElite Enterprises

MAY 2021 — PRESENT

Web Developer

- Developed custom websites to meet individual client needs.
- Created clean, well-documented custom code and updates.
- Leveraged HTML, CSS and JavaScript to build top-quality code for diverse projects; maintained MySQL/MongoDB databases for dynamic site data.
- Developed secure and reliable web-based solutions to meet customer requirements.
- Debugged websites to identify and resolve issues.

Pacific Motherwells

OCT 2022 — NOV 2023

Web Designer

- Implemented a responsive design framework using CSS Grid and Flexbox, cutting page load times by 40% and improving mobile engagement by 50%.
- Developed a design system that standardized visual elements across 20+ web properties, cutting development time for new projects by 25%.

SELECTED PROJECTS

Pulse

Node/Express · React · Uptime Monitoring

Personal uptime and keep-alive monitor for his own apps and APIs — downtime alerts, SSL/domain expiry tracking, and public status pages.

Wyntek Technologies site

Web Design · Agency Site

Designed and built Wyntek's own site — service pages and visual identity, used since as a template for client work.

Expenses Tracker

Full-stack · Personal Finance

A lightweight full-stack app for logging and categorizing everyday spending, with a fast entry flow.

Eakslin Courier

Logistics · Web Design

Service-focused site for a logistics and courier company, built for client acquisition and service listings.
